

The Lexile Framework is a valuable tool for teachers, parents and students.

It serves two unique functions : it is the measure of how difficult a text is

a student's reading ability level.

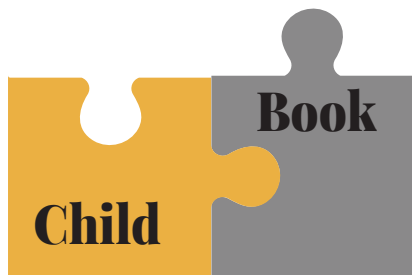

It is a **scientific approach** for reading that places both the reader and the text on the **same developmental scale**.

The higher the Lexile measure, the higher the student's reading ability level.

It starts from BR (Beginning Reader), increasing in intervals of 5L, all the way up to 2000L

developed in USA by
